EXPERIENCE

Technology Programming Analyst & Front End Developer
Medical University of South Carolina June 2016 | Present | Charleston, SC

» Responsible for the front end rebuild, refactor, and testing of a 2,000-page website.
» Implement current trends in UI design for a robust web platform.
» Refactor legacy CSS and JavaScript to be current, responsive, and modular.
» Create, implement, and test fully responsive HTML5 email templates.
» Create snippets, workflows, and templates in Sitecore and Site Executive Content Management Systems to support the goals and needs of the stakeholders.
» Build and maintain fully responsive web templates for the medical center and university.
» Ensure all code is Section 508 compliant with ADA requirements.
» Maintain and follow W3C best practices and standards.
» Train cross-functional project teams employing the latest technologies (structured HTML5, CSS3, and JavaScript frameworks) in accessible Web development.
» As a key member of the development team, provide technical recommendations and accessibility oversight of user interfaces.
» Work with internal stakeholders across the enterprise to assess their digital needs and requirements and provide strategic recommendations and direction.

School Psychologist
June 2006 | August 2014 | Greenville, SC and Holland, MI

» Worked with students, educators, and families to support the academic achievement, positive behavior, and mental wellness of all students, especially those who struggled with barriers to learning.
» Extensive training in assessment, progress monitoring, child development and psychology, consultation, counseling, crisis response, program evaluation, and data collection and analysis.
» Collaborated with staff in planning educational interventions, curriculum, behavioral management, and teaching strategies, including early intervention and response to intervention approaches.
» Interpreted school data and supported staff in providing the best research-based practices.
